Kassel, March 4 2019

Dear Mr. Caller Gutiérrez,

DGSL Accreditation

The Deutsche Gesellschaft für suggestopädisches Lehren und Lernen e.V. (DGSL) is pleased to inform you about their decision of granting the **DGSL ACCREDITATION** to CLC Caller Language Center on the grounds of the quality of their teaching and learning processes and the excellent results obtained by their students in the Test of English for International Communication (TOEIC), as indicated in the International Evaluation and Certification of the institution CLC Caller Language Center and the analysis of the results of their students.

Justification

The Deutsche Gesellschaft für suggestopädisches Lehren und Lernen e.V. "German Society of Suggestopedic Teaching and Learning" (DGSL) is an international organization founded in 1987 by teachers, trainers, and institutions applying the suggestopedic method that assures high quality, development and training taking into account the latest neuro-scientific and psychological discoveries.

DGSL has evaluated the teaching and learning process based on the suggestopedic methodology and analyzed the results of the teaching that CLC Caller Language Center has achieved in the last four (4) years through several official visits carried out by **Dr. Claudia Dostal**, founder and CEO of **Brainbox® training** from Austria, who became a member of the DGSL Training Committee in 1999.

During her visits, she not only trained the teaching staff, but also carried out professional work analyses and control of the quality of the teaching and learning processes of CLC Caller Language Center in compliance with the policies established by DGSL, which stipulate:

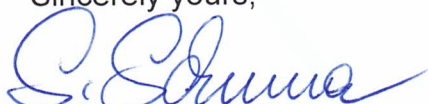

1. Pursuing the steps of the suggestopedic cycle in the lessons.
2. Stimulating the permanent use of both hemispheres of the brain.
3. Utilizing multi-sensory educational material: visual, kinesthetic and auditive.
4. Using music in the teaching process.
5. Establishing well-structured learning units.
6. Carrying out group activities permanently.
7. Creating a positive atmosphere in the learning process and ensuring good integration of all students.

Annual Reports

As a **DGSL Accredited Institution**, CLC Caller Language Center commit themselves to deliver annual reports indicating the progress and results achieved through evaluations and certifications of International Organizations according to the Common European Framework of Reference for Languages (CEFR) through the process of teaching and learning with the suggestopedic method.

The Deutsche Gesellschaft für suggestopädisches Lehren und Lernen e.V. (DGSL) would like to highlight the excellent results achieved by the students of CLC Caller Language Center in the International Evaluation and Certification TOEIC of Standard Certification from the United States of America. They reached an average score of 735 points in only one (1) year or less of studying, compared to the national average score of 626 and 608 points according to the ETS – Educational Testing Service – Official Reports from the United States of America in 2016 and 2017, emphasizing that on average 79% of students evaluated worldwide study English for six (6) years to obtain these results.

Sincerely yours,

Silvia Schuma M.A.

President
